

GREEN HOME SERIES

Registration \$55 Per Class
\$40 per class Dues Paying GBI members

This series of classes are being held in a brand new “green home” in Gambrills, Maryland. Be inspired by your surroundings and by the presentation. All Classes begin at 7pm and end by 9pm. Class location – Holladay Park Road Gambrills (Take Rt 175 to Holladay Street and turn onto Holladay Park Road.

Green Home Materials Tuesday April 27th

There is an ever-growing array of green materials to help create a healthy, environmentally friendly, stylish, energy smart and sustainable building. This Class will review product options used in construction and renovation, as well as those used for interior design such as flooring, countertops and paint.

Home Energy Audits Tuesday May 11th

Scheduling a home energy audit can be the first step to making your home more energy efficient. A trained auditor, using specialized equipment, can identify a wide range of sources of energy leaks and help the homeowner prioritize repairs based on return on investment. Audits are relatively inexpensive and will assist the homeowner in developing both short-term and long-range strategies to save on their utility bills.

Solar PV & Hot Water Tuesday May 25th

In the US alone, buildings represent almost 40% of primary energy use. Learn about residential solar power and solar hot water systems, the components that are needed, the approximate costs and feasibility for your home or business.

Green Remodeling Tuesday June 8th

What does “green remodeling” really mean when you're just redoing a bathroom or updating your kitchen? In this class, learn about every-day, real-world tips, techniques, and strategies that you can implement right away in your next home remodeling project. From simple concepts to more advanced, learn the four major components to sustainably remodel an existing home.

Wind Energy & Geothermal Tuesday June 22nd

This class provides a basic overview of geothermal and wind energy systems – their benefits, development and uses.
