

GEO-THERMAL ENERGY

Geothermal heating has been used for centuries to heat buildings by using sources of hot water and steam that lie underground. A renewable energy source, geothermal heating systems are increasingly a choice for both homes and businesses that are concerned about the environmental impact of traditional energy sources, as well as rising energy costs. This class provides a basic overview of geothermal energy systems and will include a brief discussion of financing options and tax incentives for residential homes.

Instructor:

John Love

John is the President of Love's Heating & Air, Inc. and officially established the company in 2002. He has worked in the HVAC Industry for the past 24 years, and currently holds a State of Maryland & Anne Arundel County HVACR Journeyman License, Journeyman Gas Fitter License and has a Universal CFC Certification. He is also accredited by the **International Ground Source Heat Pump Association (IGSHPA)** as a "Certified Ground Source Heat Pump Accredited Installer". He has also earned the status of a "**GeoPro Master Dealer**" with **WaterFurnace International**, a leading supplier of Geothermal heating and cooling equipment.
