FOR IMMEDIATE RELEASE

Green Building Institute Brings Green Education to Baltimore

Local residents to learn what it means to "go green"

Jessup, MD (April 3, 2009) - The Green Building Institute is launching a four-part series, "Go Green in Baltimore", to help city residents, businesses and professionals learn how to "green" their homes and businesses, improve their bottom line and help the environment.

"The Institute is committed to help Baltimore residents understand what it means to 'go green' and how each of us has an important role to play. It is a natural next step to bring our classes directly to Baltimore to make it easier for everyone to have access to this information and then do their part," says David Woolley-Wilson, Executive Director.

The series will feature:

- April 9th Building the Green Economy
- April 16th Buying a Green Home
- April 23rd Renewable Energy for Your Home and Business
- April 30th Catching the Rain

This four-part series will be take place Thursday nights at the Emerging Technology Center in the Can Company Complex located at 2400 Boston Street, 3rd floor in Baltimore.

To register for the "Go Green In Baltimore" series, read detailed class descriptions, see a complete schedule of all Institute classes, or to become a member of the Institute go to:

<http://www.greenbuildinginstitute.org> or contact Lisa McDowell at 443-733-1234 or

lisa@greenbuildinginstitute.org.

The Green Building Institute is a 501 (c) (3) regenerative social enterprise fostering sustainable building practices through education and example.
